

NSW space industry capabilities

New South Wales (NSW) has the broadest and strongest space capability in Australia:

35%

of Australia's space research and development is produced by NSW universities

41%

of all Australian space businesses are based in NSW

38%

of all Australian space startups are based in NSW

As the nation's leading high-tech research and manufacturing state, NSW offers a strong combination of technical expertise, university support and advanced manufacturing. NSW is the only Australian state with capabilities across every sub-sector of the space industry and the entire value chain.
